JOINT DISTRICT DATA

In the listings of county taxable valuation per ANB, joint districts are separated into county segments and each segment is included in the county where it is situated, both for ANB and taxable valuation.

In the listings of district taxable valuation per ANB (in county sequence), joint districts are separated into county segments, as in the county listings.

In the listings of districts by ascending taxable valuation, a joint district appears as a single district, with its entire taxable valuation and entire ANB used to determine its place in the sequence.*

For reference, joint districts are listed separately in the back of the book.

---

* In the comparable 1964-65 booklet, the listings of districts by ascending taxable valuation included the joint districts not as whole districts but as two (or three) separate segments, with each segment appearing in the sequence.
